

## SCANCENTRAL

### Network Ready

ScanCENTRAL are single foot print, stand-alone, color scan to print systems that are perfect for AEC, CAD, GIS, Reprographics, and copy shop Applications. Scan, print and copy originals (24" to 44" depending upon system chosen) including blueprints, maps, and color renderings. ScanCENTRAL Systems are computer-driven scan to print systems featuring an integrated solution of hardware and software. It consists of a Contex wide large format scanner, adjustable stand to incorporate both scanner and printer in one single footprint, color copying software for performing all the calculations for color management matching and matching color from scan to print, and a high speed color printer. The system is network ready and includes online image backup, storage and remote viewing for approval process.

### — Features

- Single Foot Print System
- Scan on High Resolution IDEAL/Contex Scanner
- Copy with Color Consistency
- Print High Quality Color Match Copies
- Touch Screen Capabilities
- Online Storage and Remote Viewing
- Product Quality and Reliability
- Unsurpassed Value for Money

## Single Foot Print

Adjustable stand allows users to set up ScanCENTRAL systems in a single-foot print configuration, by raising the stand and mounting the scanner over top of the printer; or, users can lower the stand to traditional height and set up the printer and the scanner side-by-side if that suits their work flow better.

## Designed for Your Needs

**ScanCENTRAL X44** is a single foot print, stand-alone, color scan to print system with high graphic reproduction capabilities that is perfect for Reprographics, Copy Shops, Imaging, GIS and anyone that needs high end graphic images. ScanCENTRAL X44 is a computer-driven scan to print system featuring an integrated solution of hardware and software. It consists of a Contex 42" wide large format scanner, adjustable stand to incorporate both scanner and printer in one single footprint, color copying software for performing all the calculations for color management matching and matching color from scan to print, and a high speed 44" color printer.
